

Insert new claims 13 and 14, as follows:

13. (NEW) A dry mop fabric having a first surface and a second surface for cleaning soiled surfaces comprising a micro- or ultramicro-fiber having a count of from 0.60 to 0.25 DTEX per fiber throughout both said first surface and said second surface, said loops having a number of loops per unit of area, a yarn thickness and a loop height proportioned so that when the fabric is pressed against the surface underneath it the loops remain upright or lay in an angle of no more than 45 degrees to an imaginary vertical line.

14. (NEW) A dry mop according to claim 13, wherein the height of the loops is 3-9 mm.
